Description

User Management: Role/Permission Management:
Role/Permission Management

- Roles: Need to manage mainly 2 roles
    - IT Administrator
    - IT User
- Permissions
    - Assign Permissions
    - Remove Permissions
- Rolewise permissions:
    - **IT Administrator** : A person within an IT department who builds servers, databases, networks, and storage environments. The IT administrator has a need for defining naming convention call naming schemas, and the ability to enforce them for the 2nd persona of this product.
    - **IT User** : A person within a company who wants to be able to get a particular name for something they're building such as a virtual machine that they'd like to get a name with a specific naming schema that complies with what the IT administrator wants to enforce.
