Description

Proper data is not displaying in the exported file in this scenario:

1. Opened the balance sheet breakdown page.
2. Click on the Export button to Download the data in file.
3. After downloading file when view it then it displayed the data of 34 rows where as in web app it was displaying data of 53 rows.

Verified on staging web app, Followed the same steps:

1. Opened the balance sheet breakdown page.
2. Click on the Export button to Download the data in file.
3. After downloading file when view it then it displayed the data of 34 rows where as in web app it was displaying data of 53 rows.
   - **Now its displaying the proper data in Export Report. Done, marking it as closed.**
