Target version:		Spent time:	0:00 hour
Description			
Proper data is not displaying in the exported file in this scenario: <ol style="list-style-type: none">1. Opened the Buy Sell Prompt page.2. Now from the Column dropdown unselected 1 column, after which the unselected column gets removed from the table.3. Now clicked on the Export button to the Export the data.4. After Exporting the file opened it, Here in the Export file its displaying all the Selected & Unselected columns. (Here it should display only selected columns & unselected columns should not be displayed.)

Followed below steps, now the data is exporting properly while after removing any columns.

1. Opened the Buy Sell Prompt page.
2. Now from the Column dropdown unselected 1 column, after which the unselected column gets removed from the table.
3. Now clicked on the Export button to the Export the data.
4. After Exporting the file opened it, Here in the Export file its displaying all the Selected & Unselected columns. (Here it should display only selected columns & unselected columns should not be displayed.) - **Fixed**

Also Verified on staging web app, now on the Buy Sell Prompt the data is now exporting properly based on the applied filters, selected columns, and search. **Done, Marking it as closed.**
