Description

In Entire web app where ever there's Columns dropdown is displaying In those columns dropdown user should be able to select & unselect the columns also there should be scroll bar inside those dropdowns. So need to add the Select, Un-Select & Scroll bar features in Column dropdowns.

Please check below pages:

1. Transaction log
2. Log Feeder
3. Special Combo Transaction log
4. Ind Ref Control
5. Float
6. Buy Sell Prompt
7. Industry Macro Data
8. Balance sheet break down

Verified on staging web app, Now on the above screen in its Column Dropdowns the Select, Unselect & Scroll bar feature is added but facing below issue.
issue: Select All is not working this process:

1. Open the Column
2. Now by Default it displays all the columns as selected so here Deselect any one column
3. After De-selecting one column click on the Select All option.
4. Here after clicking on the Select All Column button that De-selected column does not get selected. Here it should get selected since we are clicking the Select All option.
   (Filed Separate bug for this: https://dev.atulsia.com/support/issues/23831)

Also, after Deselecting the columns, it's displaying one column. So here after deselecting the columns it should not display any column Instead of that we can display a message like "No records found."
