##### #3 - March 10, 2025 04:06 AM - Dinesh Pedagada

Once the user is verified and provided with any portfolio and login as non-superadmin its working fine now and if a verified user tries to login without any portfolio or role need to show a error message working fine.

Verified on staging web app, Now after verifying the email id when tried to do login into the app then it shows message **You do not have permission to access the system. Please contact the administrator.** & later when Admin allots any portfolio to user then user is able to login into the web app for that particular portfolio. **Done, marking it as closed**
