Description

As discussed in the client meeting on March 11, 2025, when a Super Admin logs in, their 'My Profile' section currently displays 'Super Admin' next to the portfolio. However, it should show the role as 'Admin,' as one cannot be a Super Admin for a specific portfolio.

History

- Status changed from New to In Progress

#2 - March 11, 2025 04:38 PM - Dinesh Pedagada

Now its showing the correct data.

#3 - March 11, 2025 04:39 PM - Dinesh Pedagada

- Status changed from In Progress to Resolved

Verified on staging web app, now on the My Profile page of any super admin its displaying the proper role i.e. **Admin** instead of **Super Admin** next to the assigned Portfolio. **Done, marking it as closed**

Here, in this issue the portfolio data is the existing data stored in the database which is not changed so as a superadmin from another profile I have assigned the maheshd@atulsia.com with portfoilio and role and now its working fine.
